

Sohan Dhungel

Software Developer

Kalanki, Kathmandu, Nepal +977 9814234358 sohandhungel05@gmail.com sohandhungel.vercel.app github.com/madaxe05
linkedin.com/in/sohan-dhungel

PROFILE

Software Developer at Octacore Solutions and a Computer Engineering graduate from Tribhuvan University. Nine Android apps published to Google Play across two developer accounts, built with Flutter and Firebase, plus Ethereum smart contracts, LSTM forecasting models and Godot games. Currently deepening Java and backend development.

EXPERIENCE

Software Developer Current, 1 week

Octacore Solutions, Kathmandu

- Build and ship production software with the engineering team.
- Moved into the developer role after a two month internship with the same team.

Software Engineering Intern 2 months

Octacore Solutions, Kathmandu

- Worked across the delivery cycle, from feature development through testing and release.

PUBLISHED APPLICATIONS

Two Google Play developer accounts: [Suso Studios](#) and [Mad Axe](#).

Veritas Subscription Guard	Flutter, Drift, Firebase	Veritas PDF	Flutter
Grocressy, shopping list	Flutter, Firestore, Gemini	ColorJoy, kids colouring	Flutter, offline
HuePilot, colour palettes	Flutter, Firebase	Displayy	Flutter
GTA Cheats: All Codes	Flutter, AdMob	GTA 6 Cheat Codes	Flutter
Merge 1024, puzzle game	Flutter		

SELECTED PROJECTS

Blockchain Document Storage and Verification Solidity, React, Node

Decentralised, tamper-proof document verification on Ethereum. Solidity contracts store immutable AES-256 and SHA-256 hashes on chain, so a forged copy fails verification. Full-stack app with React, Node, Express and Web3.js. github.com/madaxe05/blockchain-document-verification

Gold Price Prediction with LSTM TensorFlow, Keras

LSTM deep learning model forecasting gold prices from historical time-series data, with an end-to-end preprocessing, training and evaluation pipeline and Matplotlib visualisation. github.com/madaxe05/Gold-Price-Prediction

Anna Chain Protobytes Hackathon 2.0

Circular-economy web platform connecting restaurants with farmers to redistribute surplus food. React front end, Firebase Functions and Firestore, with a Python rule classifier. Built with Team Berserkers.

Realm Guard, Arrow Escape, Kingdom of Aetheria Godot 4, GDScript

Three games in development for Play Store and App Store release. Realm Guard is a 35-level tower defence with an automated balance simulator that plays every wave headlessly before a build ships.

TECHNICAL SKILLS

LANGUAGES	Dart, Java, TypeScript, JavaScript, Python, C/C++, SQL, Solidity, GDScript
MOBILE	Flutter, Firebase, Riverpod, Drift, SQLite, Hive, REST APIs, AdMob, Play Store releases
WEB	React, Next.js, Tailwind CSS, Node.js, Express, Web3.js, Vercel
DATA AND ML	TensorFlow, Keras, Pandas, NumPy, Matplotlib, LSTM models, MySQL, Firestore
TOOLS	Git, GitHub, VS Code, Figma, Godot 4, Google Colab, MATLAB, LaTeX

EDUCATION

BE Computer Engineering 2022 - 2026

Advanced College of Engineering and Management, Tribhuvan University, Kathmandu

Higher Secondary, Science 2020 - 2022

Hetauda School of Management, Hetauda
PCM and Computer Science

ACTIVITIES

Protobytes Hackathon 2.0

Inter-college participant, built Anna Chain with Team Berserkers.

Figma Workshop

UI/UX design principles and prototyping techniques.

Relevant Coursework

Data Structures and Algorithms, Machine Learning and AI, Software Engineering, Data Mining, Project Management, MySQL, UML.
